About Me

Highly motivated and inquisitive Digital Engineering Master's student with a strong foundation in Programming, Software Development, and Computer Science. Eager to learn new concepts and technologies, leveraging diverse professional experiences to build a versatile skill set. Proven ability to work independently and collaboratively. Actively seeking opportunities to apply software development skills to innovative projects and contribute to the development of high-quality web content and improve users experiences.

Education

Sahyadri College of Engineering And Management, Bachelor of Science in Civil Engineering Aug 2019 – Mai 2023

Bauhuas University Weimar, Master in Digital Engineering Oct 2024 – on going

- **Coursework:** Programming(JAVA), Software Engineering, Data Structures and Algorithms, Machine Learning, Photogrammetric computer vision, Image analysis.

Projects

E-Commerce App

- Built and maintained a full-stack content-driven e-commerce platform using React.js, Node.js, Express.js, and MongoDB (MERN stack). Developed features including role-based authentication, product and order management, and Stripe/Cash on Delivery payment processing. Continuously optimized platform for SEO and core web vitals, implemented administrative tools, and automated deployment workflows to support seamless content migration and user management.

Food-Ordering App

- Developed an end-to-end food delivery application with React.js, Spring Boot, MySQL, Material-UI, and TailwindCSS. Integrated real-time delivery tracking (Google Maps API), secure payment gateway, and admin dashboards for order/product management. Improved SEO, frontend performance, and content management; leveraged scalable deployment and migration strategies to align with evolving business needs.

AI SaaS Platform

- Built and maintained an end-to-end AI SaaS application using PostgreSQL, Express, React, and Node.js. Delivered features for users to generate content and images, remove backgrounds, and review resumes. Implemented secure authentication, subscription management, and automated content processing—aligning with user support, deployment, and continuous improvement requirements from the job description.

Work

Graduate Engineer Trainee, Conserve Buildcon LLP. July 2023 – December 2023

- Structural planning and calculation, project planning & scheduling, quality control
- Construction work, coordination, negotiation, procurement, problem-solving

Executive Sales, Ceyone Marketing Pvt Ltd November 2022 – March 2023

- Documentation, sales, customer acquisition
- Consulting, negotiations, contracts, customer relations

Languages

- **German:** B1 level – basic knowledge with the ability to communicate in simple routine tasks, understand simple texts, and participate in everyday conversations.
- **English:** Fluent
